

Lifetime

Significantly reduces battery costs as Bosch Li-Ion battery packs last **4** times longer than competitors' alternatives.

Bosch high-performance battery packs

Specially developed cells with very low internal resistance and high current-capable design ensure low energy losses during charging and operation.

Bosch HCH (Heat Conductive Housing)*:

- Ensures quick dissipation of heat within battery
- Controls heat and cooling during charges
- Optimizes thermal balancing within the battery pack

Prolonged lifetime reduces maintenance and replacement costs!

* Applicable for all 14.4, 18 and 36 Volt Bosch Li-Ion battery packs

Bosch ECP (Electronic Cell Protection)

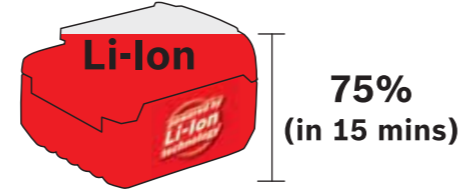

- Prevents battery cells against :
 - Deep discharges** : Reduces current flow if voltage level is at its end
 - Overheating** : Decreases current flow if the tool or battery is too hot
 - Overloads** : Reduces current flow if the current draw is too high
- Guarantees optimal tool and battery performance in the toughest conditions

Speed

Bosch Hyper-charge technology

- Achieves 75% battery capacity in 50% of the charging time
- Protects against battery overcharge and lengthens battery lifetime

Reduced work downtime and higher productivity!

* based on 30-minute charger
